1: Longrigg G-4, 5 (ca. 1915-1940) MH1 Iraq MH1

goods from the trans-'Iraq route to Muḥammara and the new Persian port of Bandar Shahpur all contributed to lessen the long-profitable transit trade, whose sentence of extinction could not, it seemed, be long delayed unless the Mediterranean route across Syria could be developed; and of this there were hopeful signs.

Banking continued in the hands of local *ṣarrafs* and the three British Banks: the Ottoman, Eastern, and Imperial Bank of Persia. The adoption of the decimal system was officially proclaimed in 1931, though twenty years later the *ḥuqqa*, the *taghar*, the *mann*, and the *dhira'* were still widely in use. Wholesale and retail trade followed familiar channels, with British firms predominating in the foreign element; 30 per cent. of the country's imports were of United Kingdom origin, though neither in this nor in any commercial operation did the Mandatary claim advantage over competitors. Imported goods found favour less by quality than by cheapness; this allowed Japanese competition for the first time to intrude, especially in cheap silk and cotton textiles. Woollen goods and steel came from Belgium, sugar from Holland, vehicles from America, wood from Scandinavia and Rumania, rice and tea from India, and most of the rest, notably cotton textiles, pumps and machinery, from Great Britain. The exports, as ever, were of dates, grain, hides and skins, wool, intestines, liquorice, and live animals. These at lowered prices held their own satisfactorily during the period of depression. Monetary conditions in Europe led, after 1930, to export of gold from 'Iraq, giving a temporary stimulus to its economy.

Until the hard times of 1929 to 1932, which they survived creditably, municipal development and the public services were expanding. A Municipal Law of 1929 superseded the Turkish regulations, municipal revenues were overhauled, and the hundred townships of every size and degree pursued their work of street improvement, bridge building, and provision of gardens, electric power plants, and sometimes officials' houses. In the major towns a period of rapid suburban development began, absorbing capital used hitherto in the transit trade. A 'New Baghdad' was planned on the right bank of the Tigris. The concession given in 1912 for electric power was amended and confirmed, after years of negotiation, in favour of the Baghdad Power and Light Company, and a new power-house came into operation; the tramway project was abandoned. Tolerable hotels appeared in the three cities and in Kirkuk, supplemented by Railway rest-houses at smaller towns. The technique of brick-making, the methods in the building industry, the types of modern dwelling-house, domestic equipment, the scale and resources of the shops: all these advanced incomparably beyond Ottoman standards. European dress was
